

# Proposed Study Plan for Dual College Majors

Please list all courses which you will need to complete for your proposed dual degree program. Include all general education requirements as well as department requirements for both colleges (may be indicated as "GE" or requirement area). If possible, it is suggested that you plan to complete one of your majors in four years and complete the remainder of the second major after the first is completed. This will ensure that you will still be able to graduate in four years if you should change your mind about a second major. ***Quarter plans should not exceed 21.0 units as course availability and excess petition approval may vary.***
